Approach

Feasibility study

Project sample

Starting point

Project sample

Objectives

Renew obsolete hardware & software

- > Servers 5 years old
- > Old Linux version
 - > Regular kernel issues on network layer
- > Oracle 11.2.0.3
 - > Out of support

Build a license supported and affordable environment

- > Support business growth

Get rid of integration issues

- > Components compatibility
 - > Improve Go To Market
- > Consolidate middle tier component

Project sample

Objectives

Scalability potential

- > Absorb customer business growth
 - > CPU / Memory / Storage scalability
- > Ease to increase availability
 - > Service availability

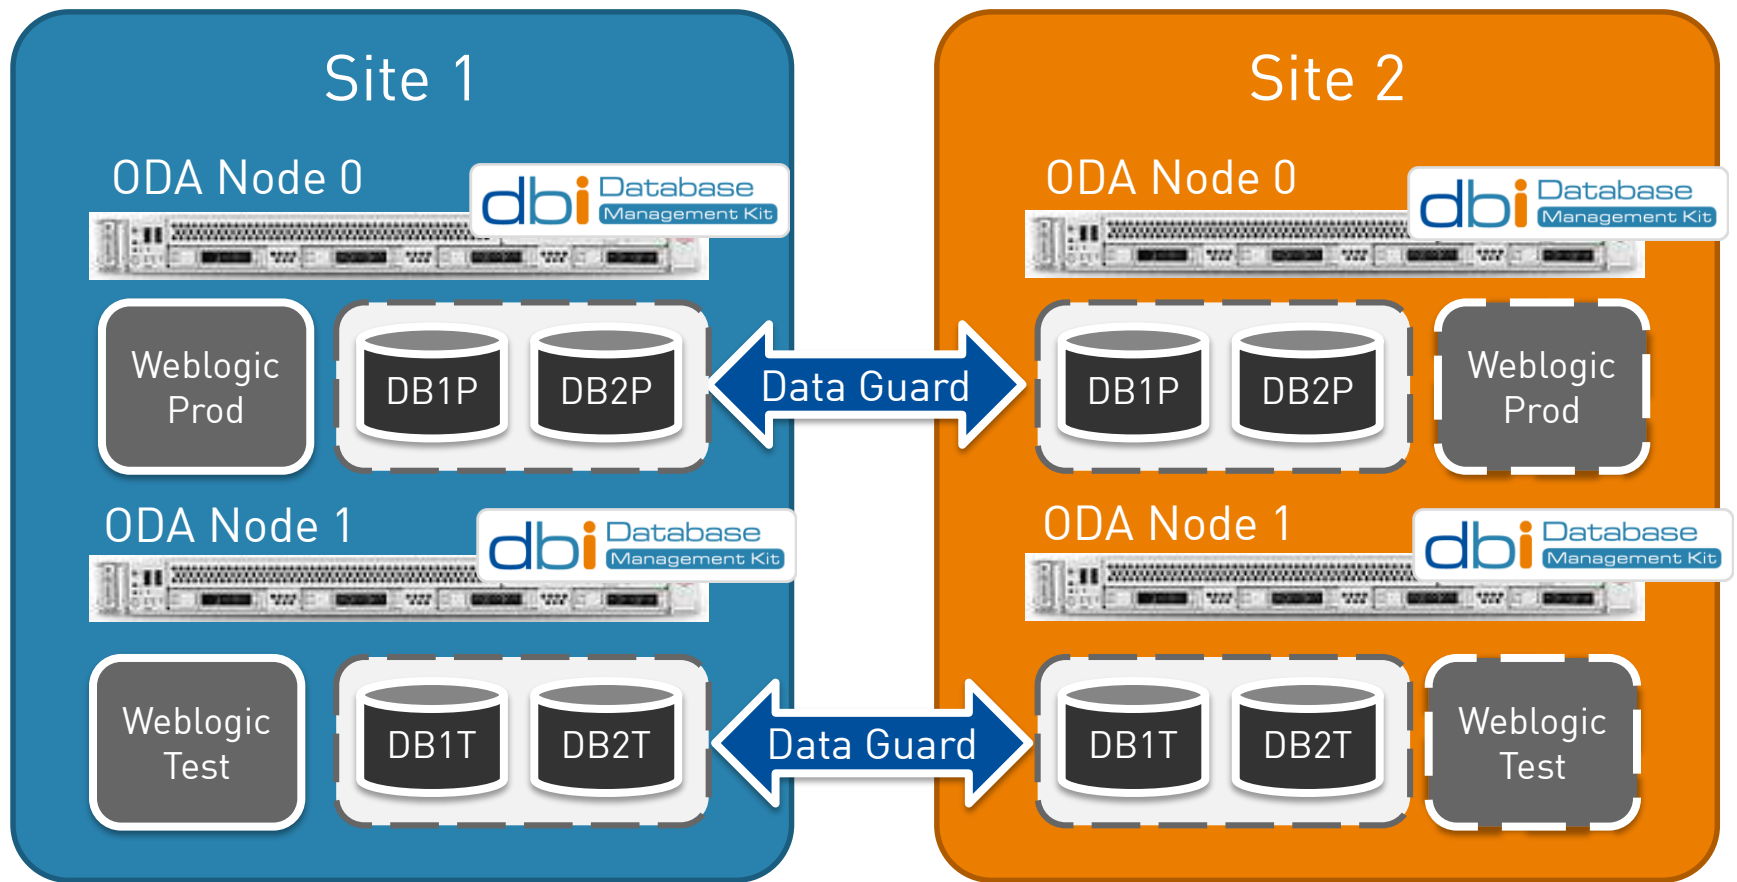

Operational capabilities

- > RTO & RPO
 - > HA for all production environments
- > Testing capabilities
 - > Including cluster features
- > Provisioning
- > Patching

Project sample

New architecture

Project sample

Benefits

Advantages

- > RTO and RPO are achievable – **for all databases**
- > Licensed conform system – **Pay as you grow licensing**
- > Optimization
 - > Application performance increase
- > Scalability
- > Operational capabilities
 - > Ease of environment provisioning
 - > Snapshot capabilities
- > Testing capabilities
 - > No more performances gap between Prod & Test
 - > All features can be validated including Data Guard
- > Ease of patching process
- > Middle Tier consolidated on ODA
