

Oracle SE Pack

Ready-to-use Oracle!
Professional infrastructure,
safe and easy to start straight away

The Oracle SE Pack is an operations platform that dbi services has perfectly customised for Oracle databases. The full package contains the following:

1. the Oracle Database Appliance ODA (server, storage, network, software, Linux operating system)
2. Oracle Database SE 2 (processor licence)
3. dbi services Best Practices configuration
4. the DMK Management Kit for efficient infrastructure administration

The Oracle SE Pack shortens the lead time for operating the Oracle Database to a minimum. Further advantages:

- higher security thanks to professional hardening of the ODA
- budget stability thanks to a transparent and fixed price and reliable licence management
- clear responsibility thanks to the single point of contact for hardware, software and services

Implement your Oracle platform in record time and take advantage of highly professional infrastructure at a fixed price.

David Hueber
dbi services CEO

“Because easy-to-deploy is not fast enough: You can start using our Oracle SE Pack straight away. Just switch it on and you’re done!”

What are the characteristics of Oracle SE Pack?

- Full package that is optimised according to the best practices of Oracle specialists at dbi services
- All-in-one bundle (hardware, software, services)
- Pre-installed solution - ready-to-use
- Attractive, fixed price which includes the licence
- Includes support for ODA and SE 2 in the first year

How much does the Oracle SE Pack cost?

The Oracle SE Pack solution is available in two versions at an attractive and fixed price. The basic package always contains the latest ODA hardware generation, the software licence as well as a professional configuration provided by dbi services' experts.

Oracle SE Pack	Small (ODA X7-2 S)	Medium (ODA X7-2 M)
Basic package	CHF 38'000.-	CHF 65'000.-
DR extension	CHF 51'000.-	CHF 78'000.-
Performance extension	CHF 4'000.-	CHF 4'000.-

Twelve months of support for the ODA database appliance and for Oracle Standard Edition 2 are included. The Disaster Recovery (DR) extension covers 12 months of support for Dbvisit Standby software.

Will I receive updates and support?

To meet your needs, dbi services offers you professional support with three different Service Levels Agreements (SLA), the dbi FlexService.

What options and extensions are available for the Oracle SE Pack?

- Physical (bare-metal) or virtual delivery
- Disaster Recovery (DR) with Dbvisit Standby
- Adjustable performance management
- Cloud expansion available
